

REMARKS

In the Notice of Allowance mailed July 20, 2005, the Examiner changed the title to --Process for Reconstruction a Nonhuman primate Animal Embryo by Nuclear Transfer Using a Heat Treated donor Nucleus and Preparing a Nonhuman Primate Animal--. However, the present invention is not directed to reconstructing primate embryos, but to reconstructing embryos of non-human mammals, as described in the specification as filed at page 11, lines 20-30. The present invention is directed to all mammalian species excluding human beings, in particular to economically important ungulates such as cattle, sheep, goats, pigs, water buffalo and horses, as well as laboratory animals such as mice, rabbits and guinea pigs, or fur animals.

It is respectfully submitted that the new title submitted with this amendment more clearly describes the invention, because the invention is not limited to embryo transfer in non-human primates.

It is respectfully submitted that the present amendment does not change the scope of the claimed invention and was necessitated by the Examiner's amendment. Accordingly, it is earnestly solicited that this amendment be entered.

Appln. No. 09/980,557
Amd. dated September 26, 2005
Reply to Office Action of July 20, 2005

Respectfully submitted,
